

IVAN CHMUTOV

Product Manager · iGaming (B2C Platform)

leeqesha66661@outlook.com | Telegram: @olenmukava

Open to relocation (Cyprus / Serbia) & remote

PROFILE

Product Manager with hands-on experience at a Malta-licensed B2C iGaming operator (casino, tier 2–3 GEOs), owning the bonus, deposit and retention area end-to-end. Strong in retention and CRM logic: player segmentation (RFM, lifecycle), loyalty and reactivation, and bonus-cost vs. NGR/ARPPU economics. Designed and launched “Streaks”, a daily reward mechanic that grew repeat deposits and NGR and lifted first-time-deposit (FTD) conversion by ~30%, with bonus abuse controlled by design. Data-driven, and comfortable owning the full loop — from player insight and analytics to shipped product.

CORE COMPETENCIES

Product: Bonus systems & promo mechanics · Deposit & payment flows · KYC/AML · Player journey & UX · Roadmap & prioritization

Retention / CRM: Segmentation (RFM & lifecycle) · Loyalty, onboarding & reactivation · LTV & bonus-cost economics · A/B testing · CRM logic across Email / Push / SMS / WhatsApp

Analytics: Google Analytics · Tableau · SQL (working knowledge) · cohort & funnel analysis

Tools & process: Jira · Figma · Scrum / Agile delivery

Domain: B2C iGaming · casino · bonus & deposit lifecycle · tier 2–3 GEOs

EXPERIENCE

Product Manager — B2C iGaming Operator (Malta-licensed)

Remote

Nov 2024 – Mar 2026

- Designed and launched “Streaks”, a daily reward mechanic (advent-calendar style) with deposit-based player segmentation. Rewards unlocked only after a deposit — abuse-resistant by design — with tiered rewards keeping bonus cost efficient. Grew repeat deposits and NGR and lifted FTD conversion by ~30%.
- Built player segmentation across the lifecycle (registration → FTD → redeposit → churn-risk → reactivation) and by RFM, turning it into targeted onboarding, loyalty and reactivation offers.
- Managed bonus-cost vs. NGR/ARPPU trade-offs through segmented offers — prioritizing incremental revenue over blanket bonuses and limiting exposure to bonus abuse and multi-accounting (with anti-fraud).
- Owned the bonus and deposit UX end-to-end, reducing friction from deposit to first reward and improving the deposit journey.
- Managed KYC/AML product flows, balancing regulatory compliance with a smooth onboarding experience.
- Worked in 2-week Scrum sprints, owning the backlog for the bonus/deposit area — from discovery and requirements to release and post-launch metrics.

EDUCATION

Saint Petersburg Electrotechnical University “LETI”

2023 – 2026

Innovation Management (“Innovatika”) — studies not completed
